

Thayer Scale manufactures a wide range of instrumentation products that can be configured to operate either a single or multi-feeder operation in either batch or continuous mode. Features include programmable analog and discrete I/O, multi-level password protection, RS232 and RS485 serial communications and a wide range of device level interfaces including DeviceNet, Profibus-DP, and Ethernet /IP.

High quality, professionally fabricated, custom packaging is available including feeder systems for use in hazardous areas, free standing control cabinets and fully integrated weigh feeder/PLC control systems.

MATERIAL FLOW AIDS

Bridge Breaker® Flow Aids, both custom designed and universal models for installation in existing bins, chutes or hoppers to reliably discharge materials which have a tendency to bridge, arch, or rat-hole.

SERVICE

Thayer Scale designs and manufactures equipment that is BUILT TO SURVIVE and provide long lasting operation in industrial environments. As with all precision weighing equipment, your Thayer Scale equipment will function best when start-up, routine service and repairs are done by a factory-trained service representative.

Start-Up Service:

Factory-trained service representatives are strategically placed around the United States. Our service department has an outstanding record of longevity, experience and achievement. THAYER technicians are available for start-up support, inspection, diagnosis and repair services, routine maintenance and calibration services, material testing, and are available for emergency, scheduled contract, and routine/preventative maintenance.
